

Sustainable Palm Oil

- **Responsibly sourced**

Our palm oil is sourced from **RSPO-certified suppliers**, which follow strict guidelines to protect forests, wildlife habitats, and local communities

- **Gentle and nourishing for skin**

Sustainable palm oil is naturally rich in vitamin E and fatty acids that help cleanse without stripping moisture, leaving skin soft and balanced

- **Creates long-lasting, quality soap**

In skincare and soap, palm oil adds firmness and stability, helping products last longer and perform consistently without excess waste

- **Lower environmental impact**

Oil palm is a high-yield crop, meaning it produces more oil per acre than many alternatives. When responsibly grown, this helps reduce the need for additional land use

- **Supports ethical labor practices**

RSPO standards promote fair treatment of workers and respect for communities in palm-growing regions

Thoughtfully sourced and responsibly used, sustainable palm oil offers dependable performance while honoring the land and the people who care for it.
